

Mexico Beach Fish Cleaning Station

Open to the Public

The City of Mexico Beach has provided a Fish Cleaning Station for the public's use, paid for using funds received from boat launch fees. The cleaning station is located next to the public boat ramp north of the HWY 98 Bridge. This facility will give the public an area to clean, wash and store fish carcasses at the end of a busy fishing day. The facility contains a walk in cooler, 4 water connections, electricity, crates to store fish inside of cooler, and 2 stainless steel tables for cleaning purposes. We are asking everyone to use the facilities, whether you're cleaning fish onsite or if you've cleaned fish elsewhere please bring them to the walk in cooler for storage. Please **DO NOT** discard fish carcasses in the canal, *thank you.*
