PROFESSIONAL ENGINEERING AND DESIGN SERVICES: STORMWATER
MANAGEMENT RETENTION POND
Addendum No. 1: Answers to Questions

Date: 5/8/23

Question 1: Have any previous planning efforts and concepts been developed?

Answer 1: There have not been extensive planning efforts carried out related to this project. The City has a basic concept for the design in terms of the potential areas where retention ponds may be created (as outlined in the document "RFQ Supplemental Maps" on the City's website), but no H&H or other studies/plans have been carried out related to this concept. Additionally, the city's resiliency plan does show some high-level conceptual concepts.
