INSTALLATION OF BYPASS PUMPS

City of Mexico Beach Scope of Work for Request for Quotes for Installation of Bypass Pumps Date:
November 12th, 2024

This request for quotes is to perform construction of three concrete pads and permanently install and connect three bypass pumps to City lift stations #9, #11, and #13. Attached to this request for quotes, are plans prepared by Dewberry, dated May 2022 for the lift station installation details. Also attached to this request are plans developed for an elevated pad that was originally designed for a 300 KW generator with a wet weight of 5,400 lbs. The elevated pad design is proposed for construction as an elevated platform to support the bypass pumps at LS #9 and #11 (the bypass pump wet weight is 3,680 lbs) and therefore, it is assumed that the engineered design for the elevated pad is sufficient for the bypass pumps. The bypass pump installation requires that the bypass pumps be permanently installed and connected at each lift station and elevated to the 500-year flood elevation.

- For LS #9, this requires that the bypass pump be elevated to 14.0 ft (NAVD 88) which would be approximately 7 feet above the existing grade.
- For LS #11 the bypass pump must be elevated to elevation 14.0 ft which would be approximately 3 ft above the existing grade.
- For LS #13 the bypass pump must be elevated to elevation 14.0 ft which would be approximately 1 ft above existing grade, therefore, the pad should be constructed according to the 12" concrete pad shown in the Dewberry plans dated May 2022.

This scope of work also includes connection of the bypass pumps to the lift stations including all pipes and fittings as shown in the Dewberry plans and labor for all three lift stations.

Please note this Request for Quotes does not include purchase of the bypass pumps. These have already been purchased by the City of Mexico Beach and are onsite/ready for installation.
